

The Engineering in Medicine and Biology Society of the IEEE advances the application of engineering sciences and technology to medicine and biology, promotes the profession, and provides global leadership for the benefit of its members and humanity by disseminating knowledge, setting standards, fostering professional development, and recognizing excellence.

The field of interest of the IEEE Engineering in Medicine and Biology Society is the application of the concepts and methods of the physical and engineering sciences in biology and medicine. This covers a very broad spectrum ranging from formalized mathematical theory through experimental science and technological development to practical clinical applications. It includes support of scientific, technological and educational activities.

### PUBLICATIONS

Engineering in Medicine and Biology Magazine

IEEE Security & Privacy Magazine

Transactions on Biomedical Engineering

Transactions on Information Technology In Biomedicine

Transactions on Neural Systems and Rehabilitation Engineering

Transactions on Medical Imaging

Transactions on NanoBioscience

Transactions on Computational Biology and Bioinformatics

**New in 2007:** Transactions on Biomedical Circuits and Systems

### ELECTRONIC PRODUCTS

EMBS Electronic Resource

### CONFERENCES

Annual International Conference of the IEEE Engineering in Medicine and Biology Society (EMBC)

IEEE EMBS Special Topic Conference on Neural Engineering (NER)

International Symposium on Biomedical Imaging (ISBI)

International Conference on Biomedical Robotics and Biomechanics (BIOROB)

ASM/IEEE EMBS Bio, Micro and Nanosystems Conference

### SUMMER SCHOOLS Sponsored by EMBS

International Summer School on Biomedical Imaging

International Summer School on Biomedical Signal Processing

International Summer School on Biocomplexity

International Summer School on Medical Devices and Biosensors
